Product Portfolio - Guatemalan Textile Collection.

Our Vision

GeckoEco was founded in June 2019. It was born from the need to create high-quality products that are not only modern and functional but also contribute to reducing waste and caring for our planet.

At GeckoEco, we aspire to be a globally recognized brand for its commitment to sustainability, Guatemalan culture, and emotional connection. We envision a world where our modern, everyday products are not only a symbol of style and functionality but also a constant reminder of Guatemala's cultural richness. We seek to merge tradition with modernity, bringing Guatemalan history and textiles to every corner of the world. Our vision is to create a global community united by the love of Guatemala, where every purchase is a way to promote sustainability, local art, and family ties, bringing people closer to home, no matter how far away they may be.

Nancy Sigui Vega, David Luna

Our Mission

At GeckoEco, we aim to connect people with Guatemala's rich textile tradition through high-quality products that combine modernity and functionality while contributing to waste reduction and caring for our planet. We produce bags and accessories that meet the needs of the present without compromising those of the future, fusing the ancestral art of Guatemalan Cortes and Huipiles with contemporary designs. Each piece is a work of art and an emotional bridge between Guatemalan families and their loved ones, regardless of the distance. We support local artisans, preserve ancestral techniques, and offer our customers a meaningful way to give and keep Guatemalan culture alive, all while striving for sustainability.
